Install fog screen

Install fog screen fixed mounting – Restaurant / Hotel advertisement / Long-term exhibition.

When the fog screen installs in a restaurant, exhibition hall or hotel or other entertainment places for a long time, it can fit under the roof beam according to the installation environment.

It should be noted that the long-term bearing capacity of the beam must be greater than 300KG.

Portable or Fixed Truss – Temporary show & activities.

Every fog screen machine has a small water tank inside. When full inside water tank. Can running 1 hour without any outside water supply. Install fog screen is very easy.

1. City water line (0.4Mpa). Connect to water input via a flexible pipe. The machine will automatically water supply.
2. Use a 60L outside water tank. Full the water tank. Can running 6 hours. After 60L water tank low level. Amount again by manual operation.

Fog screen routine maintenance.

After use every day. Need drain off all water from the machine avoid scale deposit.
